PROFESSIONAL EXPERIENCE

Overall - 8y 5m

Walmart

Seattle, WA

iOS Software Engineer (1y 8m)

Sep 2024 - Present

- Designed and implemented scalable iOS features for the Recipe module, integrated with other app pages using Swift, SwiftUI, UIKit and MVVM-C architecture.
- Built asynchronous data flows and optimized API handling using GraphQL (Apollo), improving responsiveness and reducing network latency.
- Developed analytics dashboards and alerting systems using OpenObserver to monitor app performance, crashes, and operational metrics.
- Increased unit test coverage by 21% using XCTest, improving release reliability and regression prevention.
- Implemented accessibility support in UI components to improve usability and ensure inclusive user experiences.
- Led code reviews and collaborated across product, backend, QA, and design teams to deliver high-quality releases.

UWorld

Dallas, TX

iOS Software Engineer (3y 4m)

Jun 2021 - Sep 2024

- Developed and maintained large-scale iOS applications used by 5M+ users with a 4.5+ App Store rating.
- Migrated legacy Objective-C and Storyboard based screens to modern Swift, SwiftUI, Combine, and modular MVVM architecture, reducing binary size by 20%.
- Architected asynchronous video download systems with pause, resume, cancel, and delete functionality using GCD and background tasks.
- Reduced app launch time by 20% through caching and Xcode Instruments profiling.
- Built reusable custom video player library and modular components, significantly reducing development effort.
- Managed App Store deployments and collaborated within CI/CD pipelines to streamline release cycles.
- Mentored 8 engineers through code reviews, technical guidance, and best practices, improving code quality and team consistency.

Bose Corporation

Boston, MA

iOS Software Engineer (6m)

Jul 2019 - Jan 2020

- Architected and delivered an Apple Watch application enabling gesture-based control of Bose headset features, demonstrated internally as a next-gen interaction concept.
- Integrated CoreML models for real-time detection and recognition of hand gestures, enabling seamless interaction.

Cognizant

Bengaluru, India

iOS Software Engineer (3y)

Sept 2015 - Aug 2018

- Developed and optimized iOS app features using Swift, UIKit, CoreData, and GCD, leading to a 20% improvement in app performance and measurable improvement in App Store rating.
- Resolved 95% of critical production bugs, improving app stability and user experience.
- Contributed to feature development, debugging, and production support in Agile environments.
- Built reusable UI components to standardize design patterns and improve development consistency.

TECHNICAL SKILLS

Languages:	Swift, Objective-C, JavaScript, Java, C#, Python
Frameworks & Libraries:	UIKit, SwiftUI, Combine, GCD, CoreData, AVFoundation, XCTest, Apollo GraphQL
Tools:	Xcode, Xcode Instruments, Git, App Store Connect, TestFlight, Jira
Architecture & Patterns:	MVC, MVVM, MVVM-C, MVP, Modular Architecture
Backend & API:	REST APIs, GraphQL, Firebase, JSON Parsing, Web Native Integrations
CI/CD & DevOps:	GitHub Actions, Fastlane, Continuous Integration, Continuous Delivery
AI-Assisted Tools:	GitHub Copilot, Cursor, Claude Code, Codex

EDUCATION

University of Texas at Dallas	Dallas, TX
Masters, Computer Science GPA: 3.7/4.0	Aug 2018 - Dec 2020
VIT University	Vellore, India
Bachelor of Technology, Computer Science GPA: 3.8/4.0	Aug 2011 - Jul 2015
